

Project: **963**

Project title: **Volcanic Forcing Model Intercomparison Project (VolMIP)**

Project lead: **Claudia Timmreck**

Report period: **2017-01-01 to 2017-12-31**

In 2017, no MPI-ESM1.2(LR) simulations for the CMIP6 (Coupled Model Intercomparison Project, Phase 6, Eyring et al., 2016) endorsed project VolMIP (Model Intercomparison Project on the climate response to Volcanic forcing, Zanchettin et al., 2016) could be carried out because the MPI-ESM1.2 piControl run and the corresponding working environment for CMIP6 does not exist so far. This is now expected for end 2017. In addition, no VolMIP results from other model groups around the world have been submitted to the CMIP6 data archive until now. It is assumed that a multi-model analysis of the first VolMIP experiments can be carried out in summer 2018.
