

Project: **887**

Project title: **Influence of tropical land-use transformations on local and regional climate in Sumatra/Indonesia**

Principal investigator: **Merja Toelle**

Report period: **2018-01-01 to 2018-12-31**

Explanations for the left over computing time

The simulations by the principal investigator is hampered by her duties at University due to lectures, courses, and other project work. Therefore, the project performs slow and only a few simulations could be conducted.

Computing time has been used for test runs, which will contribute to the CORDEX initiative.

Further, the project will be combined with the international CORDEX initiative over southeast Asia.
