

Project: **1155**

Project title: **COPAT2 – Coordinated parameter testing of the COSMO6.0 version and ICON-CLM**

Principal investigator: **Beate Geyer**

Report period: **2020-01-01 to 2020-12-31**

Text: The release of the new model version of COSMO and the first official version of ICON-CLM were postponed again and again and up to now neither the one nor the other is available. Therefore, only a minuscule amount of computing time was used for some pre-tests.

The new version of COSMO-CLM announced now for 01/2021. Therefore I apply again for the same resources like in the current period. The expectation is that the ICON-CLM will be available in the second quarter of 2021. As we do not know how reliable the date is, we plan to apply for further resources in May 2021.
