

Project: **1230**

Project title: **SpreeWasser:N**

Principal investigator: **Uwe Ulbrich**

Report period: **2021-11-01 to 2022-10-31**

The *SpreeWasser:N* project was supposed to have started in February 2022. Unfortunately, the *Bewilligung* (authorisation?) did not arrive from the BMBF until August 2022. At the time of writing, the FU Berlin is in the process of recruiting a PostDoc for the work which the FUB is responsible for. It is expected that the prospective employee will start their work towards the end of this year.

As such, there is currently no scientific progress to report.
