

**Project:** 1314

**Project title:** Snow Single-Scattering

**Principal investigator:** Davide Ori b381492

**Report period:** 2022-05-01 to 2023-04-30

Maximum of 2 pages including figures. 9pt minimum size

Unfortunately, due to administrative delays, the project did not start until late December 2022. During the first months of 2023 the postDoc hired to perform the tasks detailed in the project has been trained with the used of the tools available. A limited number of tasks have been performed for training and testing purposes.

The results of these initial tests have been used to better estimate the amount of computing resources needed for the new allocation period.
