

Projekt: 526

Antragszeitraum: 01.07.2009 - 31.12.2009

Projekttitel: **KLIMZUG-NORD - Strategische Anpassungsansätze zum Klimawandel in der Metropolregion Hamburg**

Diana Rechid und Daniela Jacob

The joint project KLIMZUG-NORD is a winner of the BMBF call for „Klimawandel in Regionen zukunftsfähig gestalten, Regionen gewinnen im Wettbewerb - die Welt gewinnt mit!“. It is a leading project of the Metropolitan Region Hamburg to develop adaptation strategies to climate change and to establish an interdisciplinary network between science, administration and economy in this region. It started in April 2009. The regional climate data will be provided by the Max-Planck-Institute for Meteorology to all project partners within the cross-sectional task "climate change". Within the subproject "Zukunftsfähige Kulturlandschaften", the robustness of climate change patterns and the feedback of adaptation measures of agriculture on the regional climate in Northern Germany will be investigated.
