

## **MiKlip – Datasharing**

MiKlip (Mittelfristige Klimaprognose) is a BMBF-funded project on decadal climate prediction. For more information on MiKlip, visit the project website: [www.fona-miklip.de](http://www.fona-miklip.de)

The aim of the project “MiKlip – Datasharing” is to grant access to global and regional decadal ensemble simulations performed by modules D and C, and to observational datasets developed in modules A and E to all members of the MiKlip project. This will be done via a shared data server (the MiKlip server).
